PROFESSIONAL SUMMARY

Master's student in Computer Science with an AI specialization, focusing on deep learning, neural networks, and full-stack development. Experienced in building production-ready applications using React, Spring Boot, SQL, Python, and AWS, and applying ML techniques such as CNNs, sentiment analysis, and recommendation systems.

EDUCATION

Toronto Metropolitan University	September 2025 - June 2026
Master of Science in Computer Science (AI Specialization)	Toronto, ON

York University	September 2021 - June 2025
Bachelor of Science in Computer Science	Toronto, ON

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, HTML/CSS, SQL, JavaScript

AI/ML: PyTorch, CNNs, Deep Learning, NLP, Machine Learning, Recommender Systems

Frameworks: React, Node.js, Spring Boot, JUnit

Tools: Power BI, Tableau, Excel VBA, Git, Docker, Amazon Web Services (AWS), Microsoft Excel, Microsoft Office Suite

Methodologies & Soft Skills: Agile, Team Collaboration, Communication

PROJECTS

PIAS Games (E-commerce Website)	December 2024
- Developed a full stack e-commerce app using React, TailwindCSS, Spring Boot, and SQL. - Implemented core user features including authentication, account management, cart tracking, purchase history, and product browsing. - Built admin dashboard for product creation, inventory updates, and sales analytics. - Focused on usability and error handling, ensuring a seamless customer experience.	

Nutrifit	September 2023
- Built a secure health tracking application in Java and React backed by an SQL database. - Designed features enabling users to log nutrition and exercise entries and visualize progress with interactive charts. - Integrated automated dietary feedback based on Canada Food Guide recommendations.	

B-Minor Compiler	November 2024
- Designed and implemented a compiler for a C-subset language, named B-minor. - Built modules for scanning, parsing, AST generation, type checking, and code generation. - Applied compiler theory and systems programming to create a fully functional command line tool.	

CNN Gleason Image Classifier	November 2025
- Developed a deep-learning pipeline using ResNet-50 and AlexNet to classify Gleason grades (NC, G3, G4, G5). - Wrote preprocessing pipeline converting raw dataset partitions into PyTorch ImageFolder format. - Implemented GPU-accelerated training loops, evaluation scripts, and model analysis tools. - Achieved **75% validation accuracy** (ResNet-50) on multi-class Gleason grading.	

EXPERIENCE

Maple Downs Golf & Country Club Server & Team Trainer Maple, ON	2018 - Present
- Trained and led new staff during high-volume events, developing strong communication and problem-solving skills. - Delivered high-quality service across events of 100-200+ guests.	

Session	Course	Title	Grade
FW24	AP ADMS 3701 3.00 M	Disaster Risk Management	A
FW24	AP KOR 3600 3.00 A	Contemporary Korea	A
